PROFILE

Hello, my name is Muhammad. I was born in 2002, I was born in Namangan region. I live in Tashkent now. I attended PDP Academy in 2023 and graduated in 2024. I hate being a liar and a liar.
and I say what I think

WORK EXPERIENCE

Frelanser

I worked as a freelancer for 3 months   2024

- For several months, I helped develop and develop an online store project through freelance work. I have created complex and consumer-oriented programs using the following technologies:
-
- React: I used the React library to create a high-level interactive user interface.
-
- TypeScript: I used TypeScript to ensure the code is error-free and to handle the data type correctly.
-
- Tailwind CSS: I used the Tailwind CSS library to create the site interface in a quick and simple way.

Pdp practicum   2024

- I participated in internship programs and gained advanced skills in creating different types of web pages. During these programs, I did the following:
- Creating an interface that works collaboratively with users and is based on satisfying user needs.
- Development of sites using JavaScript, HTML, CSS and other technologies.
- Loading, changing and deleting data from databases.
- Developing web pages and making them responsive.
- Tasks and high scores:
- Creating pages to provide a convenient and useful user experience.
- Create and add convenience to interactive features with JavaScript.
- Creating a great experience for pages by extracting data in a way that is accurate and actionable.
- Create custom pages for mobile devices.
- Abilities:
- You are very good at HTML, CSS and JavaScript
- Experience with data repositories and RESTful APIs
- Responsive design and page creation for mobile phones
- Solving problems and finding optimal solutions for work or programs
- Completed tasks:
- Interface design and development
- Load, modify and delete data from the repository
- Provide user interactivity
- Create mobile responsive design and customize pages
- Information:
- Completed internship programs and found effective work in practice
- Are you interested and willing to learn about my work?
- Education:
- I learned JavaScript, HTML, CSS and other technologies with the help of Practicum programs
- I improved my skills by working on real projects
